

**25/06/2016**

## **RUSNANO and the Ministry of Science and Technology of China Signed a Cooperation Agreement**

The Agreement was signed in the course of the visit of the Russian President **Vladimir Putin** to China. The Chairman of the Board of RUSNANO **Anatoly Chubais** and the Minister for Science and Technology of the People's Republic of China **Wan Gang** endorsed the document.

The parties have agreed to create a Russian-Chinese High Technology Direct Investment Fund. The Fund is to support the two-way transfer of technologies between China and Russia and import of technologies from third countries for further establishment of industrial enterprises, branches, representative offices and R&D centers in Russia and China.

The Agreement also stipulates the establishment of a joint R&D Center or a Nanotech Incubator in Russia and China.

"Despite an unfortunate recent downswing in the trade and investment cooperation between our countries, the Russian-Chinese relationship can be unequivocally described as full-fledged and amicable. RUSNANO has been actively and effectively collaborating with Chinese partners, and today's entering into the Agreement with the Ministry of Science and Technology of China should give our cooperation a new impetus," stressed Anatoly Chubais.
