

PRESS RELEASE

15/06/2017

The fund created by RUSNANO and "Fortum" won the tender for construction of wind parks

The bids of the investment Fund of Wind Power Engineering Development that has been created by RUSNANO and "Fortum" for 1,000 mW have been selected within the tender of investment projects of construction of power generating plants on the basis of renewable energy sources.

The selected bids were submitted in respect of the projects that should be put into operation in 2018-2022. The projects will be implemented under the contracts for provision of power (CPP) concluded for the term of 15 years.

Within the partnership, RUSNANO and "Fortum" on a parity basis intend to invest RUR 30 billion into construction of the wind parks in Russia. For the purpose of implementation of the projects it is planned to attract a debt financing of the projects.

The investment decisions will be made for every individual project under the general mandate of the Fund of Wind Power Engineering Development.

"We are satisfied with the results of the tender. The winning makes the portfolio company of our fund — "Fortum Energia" — the largest player of the Russian alternative energetics in general and of wind-power engineering sector in particular. We are going to implement one of the most ambitious projects in the existing domestic renewable power generation sector, and we are sure that we will meet that challenge" noted the deputy head of the Investment Division — head of the Perspective Energy Projects Unit of the MC RUSNANO, Alisher Kalanov.

In addition to the investments within the Fund, RUSNANO intends to invest additionally up to RUR 1 bln into equipment localization projects. The investments will be aimed at creating the production of nodes and components of wind turbines: blades, towers, generators and other components.

***Joint-Stock Company RUSNANO** was founded in March 2011 following the re-organisation of the state corporation "Russian Corporation of Nanotechnologies." RUSNANO supports the state policy for the development of the nanoindustry by investing in financially-viable high-tech projects and creating new industries in Russia directly or via nanoindustry investment funds. Main investment areas are: electronics, optronics and telecommunications, health care and biotechnology, metallurgy and metal processing, energy, mechanical and instrumentation engineering, construction and industrial materials, chemicals and petrochemicals. 100 percent of the shares of RUSNANO are owned by the state. Thanks to RUSNANO investments, there are currently 84 factories and R&D Centers open in 30 regions in Russia.*

Asset management of RUSNANO is carried out by Limited Liability Company "Management Company RUSNANO" that was created in December 2013. The Chairman of its Management Board is Anatoly Chubais.

The tasks of establishing nanotechnology infrastructure and educational programs are carried out by the Fund for Infrastructure and Educational Programs that was also founded following the re-organisation of the state corporation. More information can be found at www.rusnano.com
